# WHAT IS CRYPTOCURRENCY?

Cryptocurrency is a form of payment that can be exchanged online for goods and services. Cryptocurrencies work using a technology called blockchain. Blockchain is a decentralized technology spread across many computers that manages and records transactions. Part of the appeal of this technology is its security.

# EVALUATION OF BITCOIN

The first digital currency was Bitcoin mined by millions of people in different locations around the world. It was Satoshi Nakamoto, Bitcoin's pseudonymous creator, who built its decentralized system that anyone could participate in, but no one could own. When Bitcoin came into being in 2009, the promise was to be the universal electronic currency that passed around the world in minutes.

# OUR COMPANY

COMING TOKEN is a digital asset built for payments based on renewable energy recycling. It is the native digital asset on Tron blockchain technology that can settle transactions in few seconds. Holders earn passive rewards through static reflection as they watch their balance of CMG token grow indefinitely. Staking and farming.

# WHY CHOOSE COMING TOKEN?

[www.coming10.com](http://www.coming10.com)

Coming Token is a blockchain-based decentralized platform that aims to build a free, global digital content entertainment system with distributed storage technology, and allows easy and cost-effective sharing of digital content. Coming is an ambitious initiative that has lined up lots of potential milestones in the years to come.
